Product Description

In terms of appearance

The BYD Song Pro DM-i Honor Edition adopts a large-sized front grille design, with chrome decoration inside the grille to increase texture. At the same time, the LED light groups on both sides and the matte chrome trim across the front of the car greatly enhance the visual impact of the vehicle. The design of the air intake has been upgraded to make it more aggressive. Compared to the more aggressive design of the front face, the design of the rear maintains consistency and adopts a similar tail light design to the current model, ensuring high recognition at night.

Interior part

The design of the Song Pro DM-i Honor Edition continues BYD's consistent sense of modernity and technology. The central control area is equipped with a large, rotatable touch screen, a three spoke multifunction steering wheel, and a simple air conditioning vent design, creating a fresh and simple interior atmosphere. In addition, the orange color scheme embellishments make the interior appear more youthful and energetic.
